

Locate: Past Exhibitors

The American Heart Association's Scientific Sessions is the world's largest gathering of scientists and healthcare professionals devoted to the science of cardiovascular disease and stroke and the care of patients suffering from these diseases. Programming is designed to improve patient care by communicating the most timely and significant advances in prevention, diagnosis and treatment of cardiovascular disease from many different perspectives.

The annual meeting provides five days of comprehensive, unparalleled education through more than 4,000 presentations given by some of the world's top leaders in the areas of cardiovascular disease – as well as a chance to experience more than 300 exhibitors showcasing the latest cardiovascular technology, drugs and resources.
